

DEV KUMAR DAHIYA

Software Engineer · Full-Stack & Applied Machine Learning

+91 74045 12322 | devdahiya4002@gmail.com | linkedin.com/in/devkumardahiya | github.com/Dev123dahiya

Computer Science graduate (CGPA 8.5) and published researcher who builds full-stack web applications and applied machine-learning systems. Currently a full-stack developer at ethara.ai, working across React and Node backends, alongside C#/ASP.NET services, Azure data platforms, and deep-learning pipelines in PyTorch, with a first-author paper reporting 99.33% accuracy in deepfake-audio detection.

TECHNICAL SKILLS

Languages: Java, Python, C++, C#, JavaScript, SQL, HTML/CSS

Frameworks: React, Node.js, Express.js, ASP.NET, Flask, FastAPI, Material-UI, JUnit

AI / ML: PyTorch, OpenCV, CNN, BiLSTM + Attention, LLMs (GROQ), NumPy, Pandas

Data & Cloud: Microsoft Azure, Azure Data Factory, Microsoft Fabric, Power BI, PySpark, Google Cloud Platform

Databases: MongoDB, MongoDB Atlas, SQL

Developer Tools: Git, Docker, VS Code, Visual Studio, IntelliJ, Eclipse

Core CS: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networking

EXPERIENCE

Full-Stack Software Developer

May 2026 – Present

ethara.ai · Gurugram, India

- Build and ship full-stack features across a React and TypeScript frontend and a Node.js backend, owning work from API design through to UI delivery.
- Develop and integrate REST APIs and database models, and collaborate through code reviews and deployments within an AI product environment.
- Improve application performance and reliability while contributing to architecture decisions for new features.

Associate Software Engineer Intern

Nov 2025 – Feb 2026

MAQ Software · Noida, India

- Built and optimized backend services in C# and ASP.NET, improving the reliability and scalability of business-facing applications.
- Designed interactive Power BI dashboards that turned raw operational data into decision-ready business-intelligence views for stakeholders.
- Engineered data integration and transformation workflows in Microsoft Fabric and Azure Data Factory to consolidate analytics-ready datasets.
- Deployed and managed cloud solutions on Microsoft Azure, supporting scalable delivery of internal services.

Artificial Intelligence Intern

May 2025 – Jul 2025

Horizon 17 Technologies · Gurugram, India

- Designed an AI system that reads bills and invoices and estimates the carbon emissions tied to each, automating a previously manual assessment.
- Integrated GROQ-served large language models to extract and interpret structured and unstructured data from uploaded documents.
- Built a pipeline that converts extracted data into carbon-usage metrics and clear environmental insights.

PROJECTS

Emotion-Based Music Recommendation System

Oct 2025 – Dec 2025

Python, PyTorch, OpenCV, CNN [GitHub](#) · [Live](#)

- Trained a CNN facial-emotion recognition model reaching ~85% test accuracy in PyTorch.
- Built a real-time detection pipeline in OpenCV that processes live webcam frames at 24+ FPS.
- Mapped detected emotions to matching music recommendations and shipped the app on Streamlit for browser-based use with zero local setup.

Leave Request Management System

Jan 2026 – Feb 2026

React, Node.js, Express.js, MongoDB, JWT [GitHub](#) · [Live](#)

- Built a full-stack leave-management platform with role-based access for employees and managers.
- Engineered 10+ REST APIs for authentication, leave submission, approval workflows, and status tracking in Express.js.
- Secured every dashboard route with JWT and token-validation middleware; used MongoDB Atlas and deployed on Vercel and Render.

PUBLICATION

Forensic Deepfake Audio Detection Using a CNN-Attention Mechanism

Feb 2026

- Published at the International Conference on Intelligent Computing and Communication (ICICC 2026).
- Combined mel-spectrogram and MFCC features with a BiLSTM and Attention architecture, achieving 99.33% accuracy across multiple accents for real-time cross-lingual detection.

EDUCATION

Amity University

B.Tech, Computer Science · CGPA 8.5

Noida, Uttar Pradesh

Aug 2022 – May 2026
