SUMMARY

Software Developer who builds backend services, REST APIs and full-stack features with Python, C#/.NET and Node.js. At Ethara.ai I build APIs that add LLM features to live products; at MAQ Software I wrote 10 ASP.NET APIs and Azure data pipelines. Comfortable with SQL and NoSQL databases, Docker, CI/CD and Microsoft Azure. Also co-wrote a Springer-published deep learning paper (99.33% accuracy).

TECHNICAL SKILLS

- **Programming:** Python, SQL, C#, JavaScript, TypeScript, Java, C++, Go
- **Cloud & DevOps:** Microsoft Azure, Azure Data Factory, Docker, Microsoft Fabric, CI/CD, Git/GitHub, Vercel, Render
- **Backend & APIs:** FastAPI, REST APIs, .NET/ASP.NET Core, Node.js, Express.js, JWT Authentication
- **Databases:** SQL (PostgreSQL, MySQL), NoSQL (MongoDB Atlas)
- **AI & Data:** LLMs, RAG, AI Agents, MCP Servers, PyTorch, OpenCV, NumPy, Pandas, PySpark, Power BI
- **Frontend:** React, HTML/CSS, Streamlit
- **Testing:** Playwright, Postman, Unit Testing
- **Core CS:** Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Agile

EXPERIENCE

Software Developer | Ethara.ai | Hybrid | May 2026 – Present
- Built 8 REST APIs and backend services that add LLM features to live products.
- Made APIs 30% faster with better queries and caching, and raised unit-test coverage to 80%.
- Shipped 6 full-stack features in 2-week Agile sprints, working with design and product teams.

Associate Software Engineer Intern | MAQ Software | Noida | Nov 2025 – Feb 2026
- Built automated ETL pipelines in Microsoft Fabric and Azure Data Factory that load and clean 1M records.
- Built 5 Power BI dashboards that bring together business data from 4 sources.
- Wrote 10 backend APIs in C# and ASP.NET and managed Azure cloud setups for dev and staging.

AI Intern | Horizon 17 Technologies | Gurugram | May 2025 – Jul 2025
- Built a Generative AI system that reads 500 scanned invoices with OCR and LLMs, pulls out the key details, and estimates carbon emissions for each one.
- Reached 90% accuracy by improving prompts and adding checks on the LLM's answers.
- Built a data pipeline and charts for carbon-use numbers, cutting manual data entry by 60%.

PROJECTS

Forensic Deepfake Audio Detection | Python, PyTorch, CNN, BiLSTM, MFCC | Sep 2025 – Feb 2026
- Trained a deep learning model (CNN + BiLSTM with attention) that tells real voices apart from AI-made fake ones with **99.33% accuracy** across accents.
- Worked with a research team on every step: data preprocessing of 10,000 audio clips, feature engineering (MFCC, Mel-spectrograms), model training, evaluation and deployment.
- Co-wrote a research paper on this work, published at ICICC 2026 (Springer).

Leave Request Management System | React, Node.js, Express.js, MongoDB, JWT | Jan 2026 – Feb 2026
- Built a full-stack MERN app with JWT login and role-based access for 3 user roles.
- Wrote 10 REST APIs for the app's backend.
- Deployed on Vercel and Render with MongoDB Atlas, running at 99% uptime.

PUBLICATIONS

Forensic Deepfake Audio Detection Using CNN-Attention Mechanism | ICICC 2026, Springer LNNS, *Innovative Computing and Communications*, Vol. 4 | Feb 2026 | link.springer.com/chapter/10.1007/978-3-032-28594-2_9

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science | Amity School of Engineering and Technology, Noida | Aug 2022 – May 2026 | CGPA 8.60/10

CERTIFICATIONS

Microsoft Certified: Fabric Data Engineer Associate (DP-700) | Oracle Database Certification
