PROFESSIONAL SUMMARY

Python Developer with hands-on experience in building AI-driven applications, backend systems, and data pipelines. Strong in Python frameworks, machine learning, and database integration. Experienced in deploying scalable applications using cloud platforms and modern tools.

TECHNICAL SKILLS

Programming & Core

- Python, JavaScript, C#
- Data Structures & Algorithms, OOPS, DBMS

Python & AI/ML Stack

- NumPy, Pandas, OpenCV, PyTorch, Scikit-learn, Matplotlib
- NLP, CNN, Deep Learning, Data Processing

Backend Development

- REST APIs, Node.js, Express.js
- (Add if possible: Flask / FastAPI – even basic)

Databases

- MongoDB, MySQL
- MongoDB Atlas (Cloud DB)

Cloud & Deployment

- Microsoft Azure, Render, Vercel
- Streamlit Deployment

Tools

- Git, GitHub, Postman, VS Code, Jupyter Notebook, Power BI

EXPERIENCE

Associate Software Engineer Intern – MAQ Software

📅 Nov 2025 – Feb 2026

- Developed data-driven dashboards using Power BI for business insights.
- Built backend services using C# and ASP.NET, focusing on performance optimization.
- Deployed and managed applications on Microsoft Azure cloud platform.
- Worked on data pipelines and workflows using Microsoft Fabric.

Tech: Azure, Power BI, C#, ASP.NET

AI Intern – Horizon 17 Technologies

📅 May 2025 – July 2025

- Built a Python-based AI system to analyze invoices and estimate carbon emissions.
- Used NLP and LLMs to extract structured data from documents.
- Designed data pipelines for processing and transforming large datasets.
- Visualized insights using Python-based tools for decision-making.

Tech: Python, NLP, LLMs, Data Processing

PROJECTS

Emotion-Based Music Recommendation System

📅 Oct 2025 – Dec 2025

- Developed a CNN-based facial emotion detection model (~85% accuracy).
- Built real-time emotion detection using OpenCV and Python.
- Created a recommendation engine mapping emotions to music playlists.
- Deployed using Streamlit for interactive user interface.

Tech: Python, PyTorch, OpenCV, Streamlit, NumPy

Leave Request Management System

📅 Jan 2026 – Feb 2026

- Developed a full-stack system with authentication and role-based access.
- Designed REST APIs for leave handling and workflow management.
- Integrated MongoDB Atlas for scalable cloud-based storage.
- Deployed frontend (Vercel) and backend (Render).

Tech: Node.js, MongoDB, Express.js, JWT

PYTHON & BACKEND HIGHLIGHTS

- Built real-time AI applications using Python and OpenCV
- Experience in handling structured & unstructured data using NLP
- Strong knowledge of REST API design and backend logic
- Experience working with MongoDB and cloud deployment
- Familiar with ML model deployment using Streamlit

EDUCATION

B.Tech in Computer Science
Amity University, Noida (2022 – 2026)
CGPA: 8.5

PUBLICATION

Forensic Deepfake Audio Detection Using CNN-Attention Mechanism
ICICC 2026

- Achieved 99.33% accuracy using MFCC, BiLSTM, and attention models
